

Mogentale Luigi s.n.c. has gained ISO 9001 certification from **LLOYD'S REGISTER QUALITY ASSURANCE** for the following field of application:  
**design, production, installation and maintenance of air extraction plants and their components.**

**LLOYD'S REGISTER QUALITY ASSURANCE** is the Certification Organism of the famous Lloyd's Register group which, since its foundation in 1760, has always been an internationally recognised guarantee of probity and independence.

**LLOYD'S REGISTER QUALITY ASSURANCE** is one of the most authoritative certification organisms in the world. In actual fact it has been an international point of reference since 1985, when Quality Management Systems were just at their beginnings. It is now one of the five most important Certification Organisms in the world, with over 46,000 clients that include renowned multinational companies: Coca Cola, Toyota, General Electric. The certification that Mogentale Luigi s.n.c. has gained can therefore be considered to be the most prestigious award possible.

By obtaining certification, Mogentale Luigi s.n.c. aimed to gain deserved recognition for its many decades of experience in the extraction plant industry and for its unwavering dedication to customer satisfaction. What is more, the choice of an indisputably rigorous authority such as **LLOYD'S REGISTER QUALITY ASSURANCE** is further evidence of that striving for excellence that has always distinguished the work of Mogentale Luigi s.n.c.

Certification means that Mogentale Luigi s.n.c. applies the requirements of the ISO 9001 standard to all its activities, right from the initial survey to installation, followed by maintenance of the extraction plant itself:

the design stage is structured meticulously, with emphasis on emission suppression and noise reduction, always keeping in mind a modular plant structure in order to allow for future expansion  
contract and order management is transparent, with constant attention to the customer's needs  
production is meticulously planned, with rigorous testing at each stage, from cutting the sheet metal to final assembly

installation is done with scrupulous application of the health and safety legislation in force  
maintenance of the extraction plant is offered as a further guarantee of correct operation over time  
suppliers are selected with care and their goods are subjected to rigorous controls  
all aspects of the business, from human resources to infrastructures, are carefully monitored

All these issues are documented and regularly checked by **LLOYD'S REGISTER QUALITY ASSURANCE** inspectors who are specialised in the process plant sector.
